**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Applicant has overcome the rejection under 35 USC 112, 1<sup>st</sup> paragraph.

***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 7, and 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi et al, 5,938,510 in view of Hutchison et al, 5,954,569, both previously cited, as set forth in the Office action mailed 08 September 2008. Further, regarding the newly added structure, '510 does not disclose a turret driver for rotating the turret. In a similar apparatus, '569, figures 5 and 6, and column 4, lines 1 through column 5, lines 45, teaches a turret, **26**, and a turret driver, **110**, to rotate the turret. It would have been obvious to one of ordinary skill in the art to have provided '510 with the turret driver as taught by '569, for the predictable result of more effectively removing material from the surface of the disc, through both planetary and orbital relative motion between the grinders and disc.
4. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi et al, 5,938,510 in view of Hutchison et al, 5,954,569 as applied to claim 7 above, and further in view of Senga et al, 6,520,895, as set forth in the Office action mailed 08 September 2008.

***Response to Arguments***

5. Applicant's arguments filed 08 December 2008 have been fully considered but they are not persuasive. Applicant argues that the combined references do not teach the combination of a turret, a linking part connected the rotating controller and object holder inserted through a cavity of a shaft of the turret, and the newly added turret driver. The examiner disagrees. '569 clearly teaches a turret driver, as explained in the above rejection. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the details of the turret structure) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3727

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
